Transparency Effects-On

Dismiss Notifications-7 Seconds

Mono Audio-On

Flash My Screen During Notifications-Never

Text Size- 100%

Mouse Pointer Size-100%

Enable Mouse Pointer Shadow-On

User Accounts:

Local Username: Work

Full User: WilliamWork

Purpose: I created a new local User on my VM labeled WilliamWork which in this project will be used for work purposes such as school, jobs, and professional business.

Password Configuration:

-User must change password at next login: On

Temporary Password: Wc****04

New: ******2004@

Password needs a capital letter, numbers, a symbol, and a sufficient length

Google Chrome:

Google chrome was modified through settings, then performance and power. Energy saver was turned on from "turn on when battery is lower than 20%" to "turn on when computer is unplugged". This was configured as it maximizes battery usage and duration.

Video Studio Code:

Video studio code was modified through settings, then commonly used and mouse zoom scroll. Mouse zoom scroll was turned on to "zoom the font of the editor when using mouse wheel and holding ctrl. This was configured as it makes viewing a specific section of code easier by making the text larger.

Notepad++:

Notepad was modified through settings and then dark mode. The settings were switched from light mode to black dark mode. This was configured as it makes it easier to view, especially in a dark environment, preventing straining your eyes.
